Key Wildlife Site Notification - location map/site boundary

MAP 7

GWT 24th November, 1995

Gloucestershire Wildlife Trust

Key Wildlife Site Notification

Schedule 1

Site name: Sharpness Docks

District: Stroud

Parish: Hinton

Area (hectares): 5.0 hectares (approx) Grid ref.: SO675025

Site description: The site comprises one major area and four smaller areas within the dock complex. The large area is the site of old railway sidings. It stretches for approximately 0.5 kilometres between the main area of docks and Oldminster Road. It is a mosaic of habitat types composed of sparsely vegetated railway ballast, rough grassland, bramble and birch and willow scrub. Within this area a number of rare or nationally scarce plants occur. These are long established aliens associated with imported cargo and include Sickle Medick (*Medicago sativa* ssp *falcata*) (only Gloucestershire site); Twiggy Spurge (*Euphorbia pseudovirgata*) (one of only three Gloucestershire sites); Yellow Vetch (*Vicia lutea*) (only Gloucestershire site); Hungarian Brome (*Bromus inermis*) (one of only two Gloucestershire sites); a hybrid Mint (*Mentha x villosonervata*) and a Lucerne hybrid (*Medicago sativa* ssp *varia*) (only Gloucestershire site). The site also supports a range of other common plants and birds.

Four separate sites contain (respectively) (a) Austrian Yellow Cress (*Rorripa austriaca*) (a red data book species at its only Gloucestershire site); (b) Beardless beardgrass (*Polypogon viridis*) (only Gloucestershire site); (c) a rare sub species of Hoary Cress (*Lepidium draba* ssp *chalepense*) (one of only two extant British sites), and (d) Patience Dock (*Rumex patientia* ssp. *orientalis*) (only Gloucestershire site).

Reason for designation:

The site qualifies for designation as a Key Wildlife Site under Section 8.3.1 of the published criteria, i.e.: "All sites supporting populations of Nationally Scarce or Red Data Book species, and:

"All sites with established populations of alien species which occur nationally in fewer than fifteen 10km squares, or within Gloucestershire in three sites or less"

Date: 24th November, 1995 Conservation Committee (Approve/reject)
