Notes:

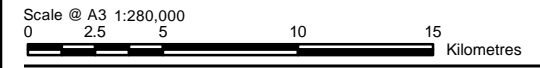

Indicative ZTV is based upon 8 turbine layout
 Hub height: 80m
 Blade diameter: 104m
 Height to blade tip: 132m

The indicative ZTV is calculated from blade tip height (132m) to a view height of 1.7m above a bare ground terrain model. The terrain model was derived from OS Landform Panorama DTM data. Atmospheric refraction and the earth's curvature have been taken into account.
